-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claim 16, the phrase "sponge-like" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "like"), thereby rendering the scope of the claims unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al (6,712,681) in view of Tsujimura et al (2002/0013124).

Art Unit: 3724

a. Chen et al discloses polishing pad comprising a layer of a porous and compressive "sponge-like" material, the "sponge-like" material having hardness in the range of 20-80 duro, and having pores with sizes in the range of 20-100 microns. See column 4, lines 30-end, column 5, lines 19-27, and column 6, lines 19-50.

b. Chen et al does not disclose that the layer is attached on an adhesive tape.

c. Tsujimura et al discloses that it is well known in the polishing pad art to use adhesive tape to secure a polishing pad. See paragraph 0011.

d. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have used an adhesive tape to attach the layer of the polishing pad as taught by Tsujimura et al.

e. Regarding claim 17, Chen et al discloses a thickness of 5 to 15 mil which falls within the range of 300-1500 microns.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

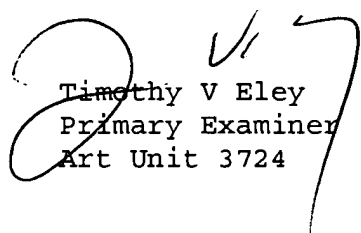

a. The cited prior art discloses polishing pad with hardness similar to that recited by applicant.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy V Eley whose telephone number is 703-308-1824. The examiner can normally be reached on M-F.
